USMAN ABID

JUNIOR SOFTWARE DEVELOPER | FULL-STACK WEB & PYTHON

+92 315 7543808 | usmandev234@gmail.com | github.com/MalikUsmanAbid | malikusmandev.vercel.app |

Faisalabad, Punjab, Pakistan

PROFESSIONAL SUMMARY

Self-taught software developer and Computer Science student with hands-on project experience in full-stack web development, Python applications, desktop software and Android development. Builds business-focused solutions with React, TypeScript, Python, FastAPI, Firebase, Supabase and SQLite. Interested in maintainable code, practical problem solving and useful real-world software.

WORK EXPERIENCE

Malik Oil Expellers - Family Business & Digital Solutions

Practical Business Experience

Samundri, Punjab, Pakistan

- Gained practical knowledge of retail operations, product management, customer service and sales processes.
- Identified digitization opportunities and applied software development skills to e-commerce, POS, digital branding and process improvement.

PROJECTS

Malik Oil - E-commerce Platform Active development

Full-stack storefront for a family-owned edible-oil business. Worked on product catalog, ordering, server-side verification, inventory and administrative workflows. Developed and reviewed backend security controls, order validation, testing and performance documentation. Deployment verification remains ongoing.

React, TypeScript, Firebase, Firestore, Vercel

CAM - Personal AI Assistant Development preview

Windows-focused AI assistant workspace with a React interface and Python API. Worked on model selection, project workspaces, task approval workflows, activity management and SQLite persistence. Focused on controlled execution and authorization policies. Full release and live integration verification are pending.

Python, FastAPI, React, TypeScript, SQLite, Tauri

SKV Construction - Business Website

Construction business website with responsive interfaces and structured company content. Implemented shared content and quotation-request integration with Supabase and server-side functions. Worked on authenticated administration, deployment configuration and technical documentation.

React, Vite, Supabase, Vercel

Malik Oil - Android Market Intelligence Development

Native Android source components for agricultural commodity market intelligence. Worked on price history, observation review, commodity monitoring, movement-alert policies and reporting. Explored coroutines, StateFlow and English, Urdu and Roman Urdu interfaces. Live integrations and production deployment require verification.

Kotlin, Jetpack Compose, Material 3

Malik Oil - Desktop POS Development

Windows point-of-sale components for practical business operations. Worked on product/customer records, sales entry, shopping cart, cash/credit workflows and inventory updates. Designed relational sales tables and explored receipts, financial reporting and business-management improvements.

Python, Tkinter, SQLite

EDUCATION

Intermediate in Computer Science (ICS) Board of Intermediate and Secondary Education, Faisalabad In progress

Secondary School Certificate (Matriculation) Board of Intermediate and Secondary Education, Faisalabad

SKILLS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3, SQL, Kotlin

Frontend: React, Vite, responsive web design, UI components, Tailwind CSS fundamentals

Backend and data: FastAPI, REST API integration, Vercel Functions, Firebase Authentication, Firestore, Supabase, SQLite

Desktop and mobile: Python Tkinter, Tauri, Kotlin, Jetpack Compose, Android application development

Tools and engineering: Git, GitHub, VS Code, Vercel, Cloudflare, debugging, database design, testing, technical documentation

AI and automation: AI-assisted development, model integration workflows, agent architecture, permission-based execution concepts

Languages spoken: Urdu: native; English: intermediate

Professional strengths: Analytical problem solving, independent learning, adaptability, business-focused development, research and team communication
